

Users can customize their settings in Enroll and Pay to better accommodate screen readers. Screen readers identify and interpret what is being displayed on the screen in a text-to-speech output device.

1. To change your personalizations, start at the **My Personalizations** link on the home screen. It is the last choice of the blue Menu frame at the left of the screen.
2. Choose **Personalize General Options**.

There are three options for Accessibility Features that can be selected from the drop down menu.

- **Accessibility Features Off** (Default)
- **Use Accessible Mode Layout:** This option is for use with screen readers. Page elements (fields, links, buttons, etc.) are presented linearly to assistive software.
- **Use Standard Mode Layout:** This option supports assistive technologies without altering the page design.

Make your selection and click ok.

You will have to log out of your account and login again in order to refresh your account and see the new setting.
