Users can customize their settings in Enroll and Pay to accommodate the usage of screen readers. Screen readers identify and interpret what is being displayed on the screen in a text-to-speech output device.

1. To change your personalizations, start at the **My Personalizations** link on the home screen.

2. Then, click on **Personalize General Options**.

3. There are three options for Accessibility Features that can be selected from the drop down menu.
   - **Accessibility Features Off** (Default)
   - **Use Accessible Mode Layout**: This option is for use with screen readers. Page elements (fields, links, buttons, etc.) are presented linearly to assistive software.
   - **Use Standard Mode Layout**: This option supports assistive technologies without altering the page design.
4. Once you have decided which option you would like, click OK. To restore your options back to default, click **Restore Category Defaults**.

5. You will have to log out of your account and login again in order to refresh your account.
