Dropping a Class

To drop a class, first start in the Enroll & Manage Classes tile on the Student Homepage and click on the Drop Classes link:

Students will be guided through the two-step process on the Drop Classes page. First, select the class(es) that you would like to drop and click the Next button. Classes with labs or discussions will be dropped at the same time.

Review the classes you intend to drop. Click on the Previous button to make changes or the Drop Classes button to proceed.
Students will be asked to confirm that they would like the class(es) dropped.

Students will receive a confirmation message after dropping classes. The message will let you know if you have successfully dropped your class or if there are errors.

Additional Notes:

- Students wanting to withdraw from all of their classes in a particular term can find more information at http://sis.ku.edu/withdraw-all-classes.
- Students in Undergraduate Engineering, Undergraduate Education, Graduate and Undergraduate Architecture, Undergraduate Pharmacy and Graduate Social Welfare will have a “DRP” hold. Students are required to meet with their advisor prior to dropping a class.
